Overlaid EWB data with zones from Auckland Unitary Plan

| Residential | | | | | | | |
|---|--------------------|-------------------------------|--------------------------------------|---|---|------------------------------|---------------------------------|
| Zone | Zoning Maps Legend | Maximum Building Height | Height in Relation to Boundary | Maximum Building Coverage (Net Area) | Maximum Impervious Area | Minimum Net Site Area² | Minor Dwellings Permitted |
| Residential - Large Lot Zone | | 8m | None | Lesser of 400m² or 20% | Lesser of 1,400m² or 35% | 4,000m² | Up to 65m² |
| Residential - Rural and Coastal Settlement Zone | //// | 8m | 2.5m: 45° | Lesser of 200m ² or 20% | Lesser of 1,400m ² or 35% | 2,500m ² | Up to 65m ² |
| Residential - Single House Zone | | 8m | 2.5m: 45° | 35% | 60% | 600m ² | Up to 65m² |
| Residential - Mixed Housing Suburban Zone | | 8m | 2.5m: 45 | 40% | 60% | 400m ² | No |
| Residential - Mixed Housing Urban Zone | | 11m | 3m: 45° | 45% | 60% | 300m² | No |
| Residential - Terrace Housing and Apartment Buildings Zone | | 16m | 3m: 45° | 50% | 70% | 1,200m² | No |

| Open Space Zones | | | | | | |
|---|--------------------|---|-------------------------------|---|--|--|
| Zone | Zoning Maps Legend | Gross Floor Area of Individual Buildings | Maximum Building Height | Maximum Building Coverage (Net Area) | Maximum Impervious Area | Minimum Net Site Si |
| Open Space - Conservation Zone | | 50m² | 4m | 1% | Lesser of 10% or 5000m ² | Refer Unitary plan, Chapter 38 Subdivisio – Urban, E38.10. |
| Open Space - Informal Recreation Zone | | 100m² | 8m | 10% | Lesser of 10% or 5000m ² | Refer Unitary plan, Chapter 38 Subdivisi – Urban, E38.10. |
| Open Space - Sport and Active Recreation Zone | | 150m² | 10m | 30% | 40% | Refer Unitary plan, Chapter 38 Subdivisi – Urban, E38.10. |
| Open Space - Civic Spaces Zone | | 50m ² | 4m | 5% | None | Refer Unitary plan, Chapter 38 Subdivisi – Urban, E38.10. |
| Open Space - Community Zone | | 300m² | 8m | 50% | Varying | Refer Unitary plan, Chapter 38 Subdivisio – Urban, E38.10. |

| Business Zones | | | | |
|--|----------------------|--|--|---|
| Zone | Planning Maps Legend | Maximum Building Height (unless Specified in Height Variation Control) | Height in Relation to Boundary | Minimum Net Site Size ³ |
| Business - City Centre Zone | | Subject to Height Variation Control | Varies depending on location in City Centre | 200m ² |
| Business - Metropolitan Centre Zone | | 72.5m | Varies depending on zoning of adjacent site | 200m ² |
| Business - Town Centre Zone | | Subject to Height Variation Control | Varies depending on zoning of adjacent site | 200m ² |
| Business - Local Centre Zone | | 18m | Varies depending on zoning of adjacent site | 200m ² |
| Business - Neighbourhood Centre Zone | | 13m | Varies depending on zoning of adjacent site | 200m ² |
| Business - Mixed Use Zone | | 18m | Varies depending on zoning of adjacent site | 200m ² |
| Business - General Business Zone | | 16.5m | Varies depending on zoning of adjacent site | 200m ² |
| Business - Business Park Zone | | 20.5m | Varies depending on zoning of adjacent site | 1,000m² |
| Business - Heavy Industry Zone | | 20m | 6m: 35° | 2,000m² Minimum average site size: 5,000m² |
| Business - Light Industry Zone | | 20m | 6m: 35° | 1,000m² Minimum average site size: 2,000m² |

| Rural Zones | | | |
|----------------------------|----------------------|--|---|
| Zone | Planning Maps Legend | Maximum Building Height | Minimum Net Site Size ⁴ |
| Rural Production Zone | | 9m for dwellings, 15m for other buildings | 80ha – Minimum average site size: 100ha |
| Mixed Rural Zone | | 9m for dwellings, 15m for other buildings | 40ha – Minimum average site size: 50ha |
| Rural Coastal Zone | | 9m for dwellings, 15m for other buildings | 40ha – Minimum average site size: 50ha |
| Rural Conservation Zone | | 9m for dwellings, 15m for other buildings | 10ha – Minimum average site size: 20ha |
| Countryside Living Zone | | 9m for dwellings, 15m for other buildings | Refer Unitary plan, Chapter 39 Subdivision – Rural, E39.6.5.2. |

| Future Urban Zones | | | |
|--------------------------|----------------------|--|--|
| Zone | Planning Maps Legend | Maximum Building Height | Minimum Net Site Size |
| Rural Production Zone | | 9m for dwellings and buildings accessory to dwellings, 15m for other accessory buildings | Refer Unitary plan, Chapter 39 Subdivision – Rural, E39.4.3 |

Experienced wellbeing

Grouped zones based on common environmental characteristics

| Place | Unitary Plan categories | Characteristics | Obsv |
|-------------------------|--|--|------|
| Transport routes | Road, strategic transport corridor | Roading/rail | 150 |
| Residential high | Residential – Terrace Housing and Apartments | 16m height limit | 41 |
| Residential medium | Residential – Mixed housing urban | 11m height limit | 323 |
| Residential low | Residential – Mixed housing suburban, Residential single house | 8m height limit | 681 |
| City centre | Business – metropolitan centre zone, business – city centre zone, business town centre zone | 200m2 minimum site, High rise possible | 54 |
| Neighbourhood centre | Business – local centre zone, business - neighbourhood centre zone, Business – mixed use zone, Business – general business zone | 13m – 18m height | 51 |
| Business heavy | Business – heavy industry zone, business – business park zone | 20m hight limit Lot size > 2000m2 | 11 |
| Business light | Business – light industry zone | 20m hight limit Lot size > 1000m2 | 28 |
| Medical | Special purpose – healthcare facility and hospital zone | Hospitals | 27 |
| Education | Special purpose – school zone, special purpose – tertiary education zone | Schools and universities | 11 |
| Rural | Rural – mixed rural zone, rural – rural production zone, coastal – general coastal marine zone, rural – rural coastal zone, future urban zone | Rural and marine areas | 7 |
| Open space | Open space – conservation zone, open space – informal recreation zone, open space – community zone | Open space | 10 |
| Sport | Open space – sport and active recreation zone, special purpose – major recreation facility zone | Sports facilities | 59 |

We can use more sophisticated statistical techniques to identify the unique impact of activity, social context, and place on wellbeing.

The table on the left gives the marginal impact of each of these factors after controlling for differences between individuals (i.e. an individual fixed effects model)

How valuable is access to dedicated sports facilities?

37 out of 1453 responses (2.5%) in our sample are sporting activities

Most sporting activity in our sample takes place in low-rise residential zones

How valuable is access to dedicated sports facilities?

We can compare the marginal impact of time spent in a sporting zone to time spent in a residential low zone.

Difference in experienced happiness: 2.68 – 2.35 = 0.33

By comparing this value to the impact of a change in a person's income on wellbeing we can answer the question how much money could a person spend on access to the average sporting facility in our sample and remain happier than they were to begin with?

Economists call this value the compensating variation (CV)

How valuable is access to dedicated sports facilities?

$$\mathsf{CV} = \left(Y_0 - e^{\left[\ln(y_0) - \frac{\alpha\gamma}{\beta}\right]}\right) \times t_p \times t_r$$

 Y_0 =reference income (\$26,200 – median income of benefit recipients) α =impact of sports facilities on happiness (0.33 – from regression) γ =impact of happiness on overall life satisfaction (.03 – from literature) β =impact of doubling a person's income on life satisfaction (0.79 – from literature) t_p =proportion of time spent in sporting activities (0.025 – from app data) t_r =proportion of sporting activity in low rise residential areas (0.46 – from app data)

CV = \$35.90 per person per year

Limitations

• Sample

- We only have the first wave of experienced wellbeing data collection which limits sample size we need to be careful about the estimates presented here and there are limits to how much detail we can meaningfully explore
- Our sample focuses on social housing tenants their experience may differ from the rest of the population in important ways
- Data
 - This is the first study of this type in Aotearoa we are probably not getting all of the questions right (29% of activities are "other)
 - Zoning data from the Auckland Unitary plan is only one example of data on place that we can link to experienced wellbeing data we are likely to be able to get more meaningful place-related outcomes than those presented here
